

Soluciones magnéticas industriales

Plastic industry

The entire plastics industry can be divided into two parts.

Plastic processing, which involves raw materials and virgin plastics being combined and then processed into various plastic products, such as household plastic items or sturdy plastic boxes that you can see used in the industrial sector. They could even be processed in plastic bags and packaging.

Magnetic Separators Designed for the Plastics industry

Magnetic bars

Magnetic grids

Magnetiic Filter for granulates

Magnetic cone filters

Magnetic plates PMF

Magnetic plate PND

Magnetic pulley

Overband with permanent magnets

Eddy Current separator
